- Proficient in the program
- Good team player
- Conscientious

Weaknesses

- English needs improvement
- Afraid of loneliness
- Fear of losing

Threats

- Indolence
- Poor power

Opportunities

- Large Industry demand
- vacancies

Elevator Pitch

Hello, my name is AlejandroZhengZheng. I am a software engineering student seeking for a job that will begin in January. I'm interested in design and testing; thus, your web design engineer role would be a wonderful fit for me. Throughout the course, I worked on many webs' development projects, and last summer I interned at XXX Company, where I built web architecture, did testing, and wrote a summary report. I think you've made some fantastic products, and I'm particularly intrigued by 3D web sites. I'd appreciate it if you could look at my resume and consider me for an interview.
